***Allowable Subject Matter***

1. Claims 1, 3-8, 11-17 and 16-22 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art made of record fails to anticipate or make obvious the claimed invention. Specifically, the prior art fails to teach, in combination with the remaining elements:

the method wherein the information processing apparatus for generating printing data to be transmitted to a printing apparatus "for controlling to display a user interface for editing print setting information of a print job generated by combining the plurality of print jobs stored in said spool means".

Although Barrett and Applicant's Admitted Prior Art teaches some of the claimed matters, Barrett and Applicant's Admitted Prior Art fails to teach an information processing apparatus for generating printing data to be transmitted to a printing apparatus comprising a means for editing print setting information of a print job stored in a print spooler. Other prior art made of record such as Bladow are also silent on this claim limitation.

***Inquires***
